Otto Schaefer Bibliography

First Author

*This was an unpublished, widely circulated intradepartmental memo advising nurses, physicians and health administrators in the Medical Services Branch, as well as all university consultants and individuals concerned with health problems of Indian and Inuit children. It is therefore listed in the bibliography and discussed in detail in this monograph.*

62. Schaefer, O. “Medical research in remote areas with isolated populations – Needs, benefits, and limitations.” In, Sarsfield P, eds. Lectures in Community Medicine. St. John’s: Memorial University, Faculty of Medicine, Division of Community Medicine, 1984: 12-23. (Expanded version of #59 “Medical research in remote Northern areas and isolated populations: Needs, benefit and limitations.”)

Presentations

109. Schaefer, O. “Meningitis in the Canadian Arctic.” Presented to the Pediatric Consultants, Immunologists and Health Care Administrators from several universities and the NWT concerning a study proposal for Hemophilus Influenzae B at the University of Alberta, July 1985.
