

ADVANCING CHILDREN'S HEALTH, TODAY & TOMORROW

Children have often been neglected in medical research, leaving their unique health needs unmet and their futures compromised.

Over the last 20 years, our partnership has helped reduce inequities, close gaps and spotlight the need for specialized research and care.

A ONE-OF-A-KIND ADVANTAGE

As the only research institute in Canada dedicated to children's health, perinatal health, and women's health, our researchers address the distinct and intersecting needs of over half the population.

- **WCHRI**
- **CHILDREN**
- **WOMEN**

Your research institute is embedded in a top 5 Canadian university and linked to a world-class quaternary care hospital.

Our partnership offers a financial advantage - your research investments are directed to research, not faculty salaries or capital costs.

Over half of our membership are clinicians, directly connecting research to patient care.

OUR CALL TO ACTION. OUR PASSION. OUR WHY.

Developing child and maternal-focused strategies for prevention and early interventions to improve health across generations.

THE POWER OF PARTNERSHIP

1000+ RESEARCHERS AND RESEARCH TRAINEES

35+ RESEARCH STARS RECRUITED

30 CANADA RESEARCH CHAIRS

1300+ ANNUAL PUBLICATIONS

\$600M+
IN
EXTERNAL RESEARCH FUNDING

Thanks to your support, we have achieved 20 years of extraordinary progress:

- *Building essential support teams for life-saving & life-improving clinical trials*
- *Attracting top research talent to drive discovery*
- *Empowering the next generation with vital training*
- *Generating innovative strategies for prevention & treatment*
- *Shaping practices & policies that make a difference*
- *Transforming health outcomes for children & families*

OUR FOCUS IN THE NEXT 10 YEARS

Research is essential to giving children the best chance at long, healthy lives. Together we can advance children's physical and mental health by:

- 1 Driving early intervention & prevention** → Supporting research that explores the origins of chronic disease, enhances early diagnosis and leads to treatments that improve a child's life trajectory.
- 2 Pioneering technology & innovation** → Uniting tech and talent to deliver data-driven solutions that improve child health from hospital to home.
- 3 Leading clinical trials** → Continuing to expand research access to ensure more families can benefit from life-saving and life-improving clinical trials.
- 4 Prioritizing Indigenous child health** → Creating a supportive environment where community-driven and culturally-grounded Indigenous health research can thrive.
- 5 Focusing on precision child health** → Enabling targeted research to optimize the health journey from advanced diagnostics to cutting-edge therapies to personalized treatments.

LIGHTING THE WAY

RESEARCH SAVES LIVES AND SPARKS HOPE. BUT REAL CHANGE TAKES TIME AND VISION.

With a new hospital on the horizon, now is the time to craft a visionary blueprint for the future of children's care.

As we pursue breakthroughs, we recognize every step forward is crucial to progress. Together, we'll light the way to a healthier future for children and families.

EMBRACING THE FUTURE

Research drives innovation. A new Stollery hospital will provide leading edge healthcare - fueled by the research and talent that is supported by our partnership.
