THE YEAR IN REVIEW:
THE CHIEF LIBRARIAN’S PERSPECTIVE

While watching the last sporting event on the planet with a mass audience (Oilers vs. Jets) on March 11, 2020, a colleague looked at his phone and said “the NBA just shut down.” We all sensed that this was a watershed moment. If a multi-billion dollar entertainment conglomerate shut down over a positive COVID case, suddenly it seemed inevitable that we would all follow suit. And so we did.

For the Library, the restrictions on gathering and proximity meant that we shut down all of our locations, with the exception of a portion of Cameron that remained open until December. Our Cameron experience has taught us much about operating libraries according to fluid directives, which will serve us well as we move through resuming activity on our campuses.

Closing our doors also suspended access to Canada’s second-largest academic collection, spread across multiple locations on four campuses. We responded by increasing digital content access in various ways, one of which was to integrate the HathiTrust Emergency Temporary Access Service, making over one million print titles on our shelves available digitally. We also launched a curbside delivery service that has provided essential materials safely and conveniently.

In many other ways, however, the closure of our buildings highlights what libraries have increasingly recognized: we have become digital-first organizations supporting a complex and rich array of online services and platforms. With the exception of increasing staffing for our online chat service, our online presence—including our library catalogue, research and data repositories, open educational resources, local and licensed digital collections, etc.—has continued uninterrupted throughout the pandemic.
An important aspect of helping the UofA community not only get through this challenging time but also to continue to learn, research, and grow, has been to recognize that we needed not only to support changing needs but also to create a sense of personal connection and support in an entirely online teaching and learning environment. In a stroke of fortuitous timing, we implemented a new online reading list service just as courses went online, enabling easy integration of custom reading lists into eClass. Our online help services have never been so busy, ensuring that students and faculty can still connect with our expert staff.

As spring and vaccines arrive in Alberta, we join our entire community in hoping that we will soon return to campus. Many have observed that the journey back to normal may not lead us back to our point of departure. I hope that this collective experience has opened our minds and hearts to exploring other ways of doing things that we might just consider integrating into our new normal. If nothing else, this pandemic has made me more confident that the University of Alberta Library’s contributions to teaching, learning, and research will remain strong as our institution evolves.

"I just wanted to share that I personally love the chat with us tool. I have used it nearly every semester and the people that I speak with are always incredibly helpful, even if it takes a bit of time. I just wanted to say thank you and that I hope it continues in the future for other students to use (especially with lack of in person due to covid)"
