Colloquium: Implementing Ecosystem Management

Carrefour de la recherche forestière
Québec Congress Centre - Room 206 B
Québec City, Québec
September 19th, 2007

How can ecosystem based management (EBM) contribute to achieving sustainable forest management in Quebec? This one-day workshop at the *Carrefour de la recherche forestière* will focus on the realities, successes and challenges of implementing EBM, and its application in forest management planning, policy and operational practices. Workshop presenters will share their experience and insight into EBM approaches, strategies for implementation, economic viability, social and political acceptability, cost-effectiveness, the trade-offs involved, and the monitoring systems and partnerships required.

8:30	Registration
------	--------------

8:45	Welcome and introduction Jim Fyles, Scientific Director, Sustainable Forest Management Network
------	--
