Name:				
Date:				

For the object(s)/image(s) presented:

1. Identify the object and its function.

2. Identify the class of material and material(s) of construction.

3. Identify the performance deviation for the failure.

4. Identify and classify any observed evidence of damage (energy and type of damage).

5. Explain the most likely cause of the performance deviation (mechanism and how it works).

6. Suggest measures to correct the performance deviation.
