Why Open Educational Resources are Critical to Lifelong Learning and the Sharing Economy

TODAY WILL BE AN ADVENTURE!

LEARNING OBJECTIVES

- **1.** Understand the concept of open educational resources (OER)
- 2. Understand the role of OER in the open education movement
- 3. Know where to find OERs
- 4. Understand the role of librarians

We're going to build an open educational resource together!

Introduction and Brainstorming Activity Let's put our heads together

Please introduce yourselves!

→ Your name and occupation/industry

→ Give an example of an <u>open</u> (online or print) resource that you've used

A little bit about my background...

I like to tinker...

First family computer

Atari 1040 ST

What are Open Educational Resources? Why should librarians (or anyone) care?

"

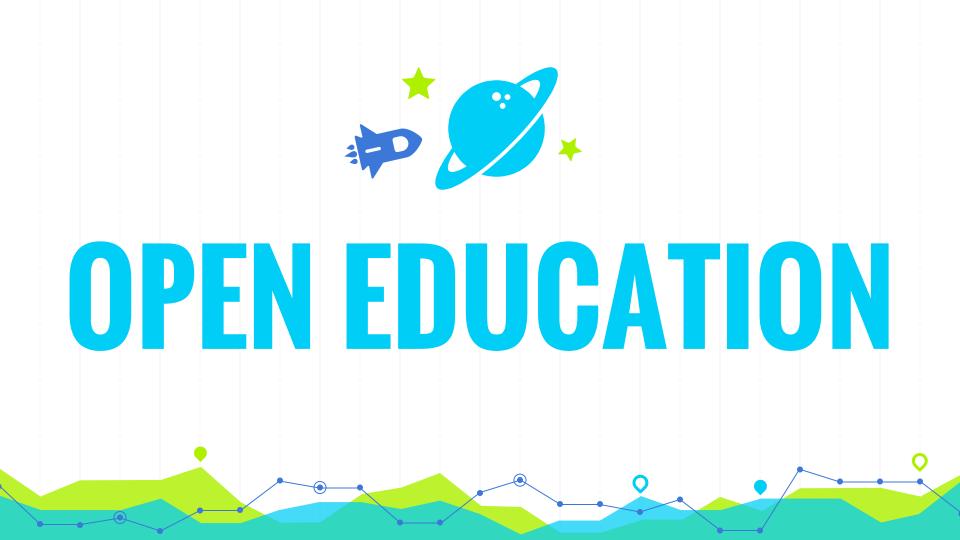

the open provision of educational resources, enabled by information and communications technologies, for consultation, use and adaption by a community of users for non-commercial purposes

~ "Open Educational Resources" coined at a <u>2002 UNESCO</u> <u>conference</u>

"

digitised materials offered freely and openly for educators, students and self-learners to use and reuse for teaching, learning and research"

~ OECD in *<u>Giving Knowledge for Free</u>* (2007)

OER In Higher Education

OER can be much broader

- → Open source software / tools
- → Presentations / slide decks
- → Code repositories (GitHub)
- → Open data
- → Manuals and technical guides

Interested Parties

→ Librarians → Students / learners → Administration / leadership → Government / policy makers

FINDING OER MIT OpenCourseWare BC Campus / Open Stax OER Commons

Search Activity

Let's put our heads together

Working in pairs or groups...

- 1. Choose a group name (3 min)
- Copy the Template (slide 31) right click + "Duplicate Slide" (2 Min)
- 3. Using an OER repository, find one OER that could be useful to your work, your patrons, or industry colleagues (**15 min**)
- 4. Fill in the blanks in the template (10 min)

resource for find "how to do X" in a various coding langauges. Howver we included stackexchange because this format of voting answers up and down is available for more than just coding. As an open educational resource it pairs really well with something like w3schools.com which is a tutorial site. The combination of a site where the answers are presented and contested, and a site where answers are presented as facts is a good way to explore and learn.

Useful enough. Not a lot of context given for the document. Also, older versions of document listed, so we need to scroll through to find the most recent version.

"The ultimate crowdsourcing framework to analyze or enrich data that can't be processed by machines alone." Some features in Pybossa are:

- Uploading videos and PDFs etc.
- Import data from Amazon S3, Flickr, Dropbox, Google, Twitter, SoundCloud...
- Export the data in JSON, CSV or to a data repository like open source CKAN if you prefer.

Use/resuse/open license info not apparent on individual resources Closed format - PDF - hard to remix etc By the MIT librarian - yay! Metadata lacking; what year was the resource created? Speaking notes lacking from the slide deck - uncertain what some of the slides mean?

Yes mostly. Not the most usability friendly interface for online reading. But free textbook with free ancillary resources (example course .pptx). Downloading may be better (eduroam didn't download fast enough).

This OER found in OER commons is highly biased and shows that we need critical information literacy skills when approaching OER. The OER commons link just took us to the Chevron website so we had to do some Internet Archive sluething

to find the game.

Conclusion

SOCIAL BENEFITS OF OER

They promote lifelong learning

They expand access to learning materials to students inside, and outside, the academy.

Any questions?
