

Tracking Change: Local and Traditional Knowledge in Watershed Governance is a six-year research program funded by the Social Sciences and Humanities Research Council of Canada (SSHRC) and led by the University of Alberta, Mackenzie River Basin Board, and the Government of the Northwest Territories in collaboration with many other valued Aboriginal organization partners and universities. The broad goal of the project is to create opportunities to collaboratively document and share local and traditional knowledge (LTK) about social-ecological change in the Mackenzie River Basin, Lower Mekong, and Lower Amazon Basins and determine its' role in watershed governance.

Aboriginal organization partners of the *Tracking Change...* project are those Aboriginal governments, organizations and co-management boards who provided a letter of support for the 2014 funding application to SSHRC, including acknowledgement of the *Principles of Partnership*. Other Aboriginal organizations can be added as partners by i) by being nominated by an existing Partner or member of the MRRB Traditional Knowledge and Strengthening Partnerships Committee, and ii) becoming a signatory to the **Tracking Change... Guiding Principles of Collaboration** (see attached, also posted at www.trackingchange.ca).
