*“uplifting the whole people”*

— HENRY MARSHALL TORY, FOUNDING PRESIDENT, 1908

# Agenda

- 1. If one-shot workshops are here to stay, how can we maximize their effectiveness?**
- 2. Three key principles:**
  1. Clearly identify goals and expectations (or, don't try to do too much)
  2. Plan active learning strategies
  3. Provide time for personalization
- 3. How does assessment fit in?**

# If one-shot workshops are here to stay, how can we maximize their effectiveness?

- **Make two columns:**

- What successes have you had during “one shot” workshops?
- What frustrations have you experienced during “one shot” workshops?

**[Teaching strategy: Activating & assessing prior knowledge]**

# The “Nightmare Scenario”

Professor: This is the major assignment for the course so there’s quite a lot involved. Let’s see... Well, the students will need to be able to develop search strategies, generate keywords, and use the databases. I really like the MLA International Bibliography, so show them that, and make sure they know how to use all of the features. Actually, they should probably also know how to use Scopus, Academic Search Premier, CQ Researcher, EconLit, EEBO, SciFinder Scholar, Web of Science, Factiva, and Lexis-Nexis. They are writing an annotated bibliography that will be due the following day, so please don’t forget to talk about how to evaluate information. Last semester, they had trouble with that. They will also need to know how to construct an annotation; we don’t go over that in class. And citations! Citing is important. They’ll be using a hybrid of APA and MLA, so be sure to cover both. Ah, I almost forgot the books. I love books, and I know the students do too, so talk about the library catalog! Why don’t you show them around the stacks too? My students say they love books but can’t seem to ever find them. Actually, a tour in general would be great. You do that right? Right. Oh, and the students won’t know their topics when they arrive and likely won’t have any idea why they are there.

Librarian: [Incredulous silence.]

Professor: You still there?

# Principle 1 – Clearly identify goals & expectations

Nice to know  
but not crucial  
to assignment

*Worth being  
familiar with*

Outcomes/concepts  
that have direct  
application but are not  
main focus of  
assignment

*Important to  
know and do*

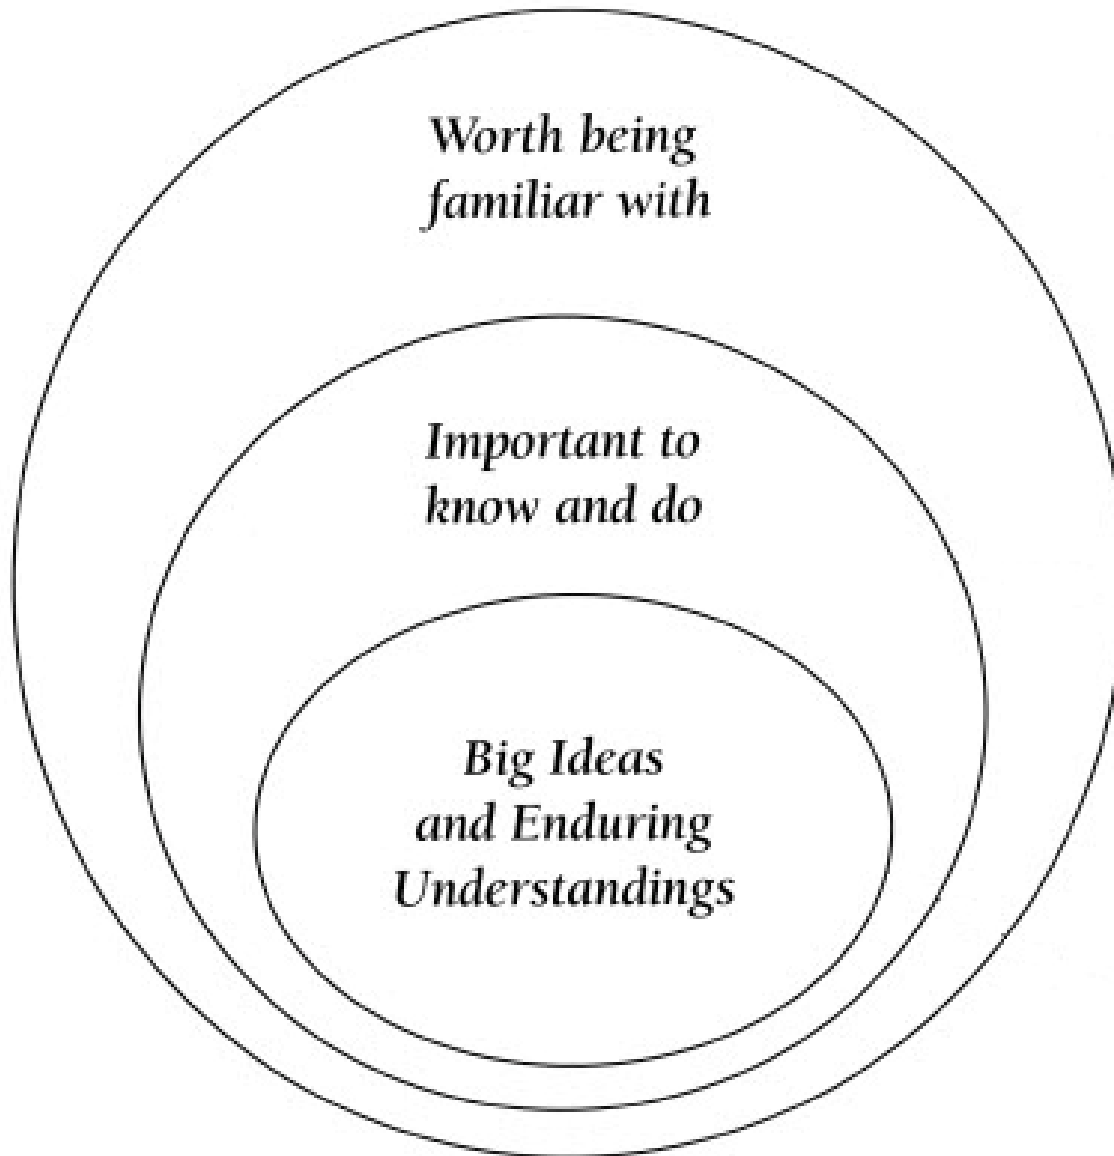

The MOST  
important outcomes  
or concepts that  
are main focus of  
assignment

*Big Ideas  
and Enduring  
Understandings*

**Use Understanding By  
Design to determine  
priorities:**

- Identify goals
- Develop clear and specific learning objectives/outcomes
- Determine acceptable evidence of learning
- Design effective learning activities

# Principle 1 – Clearly identify goals & expectations

## Task:

**Based on the “Nightmare Scenario” identify the three parts of the UBD Egg.**

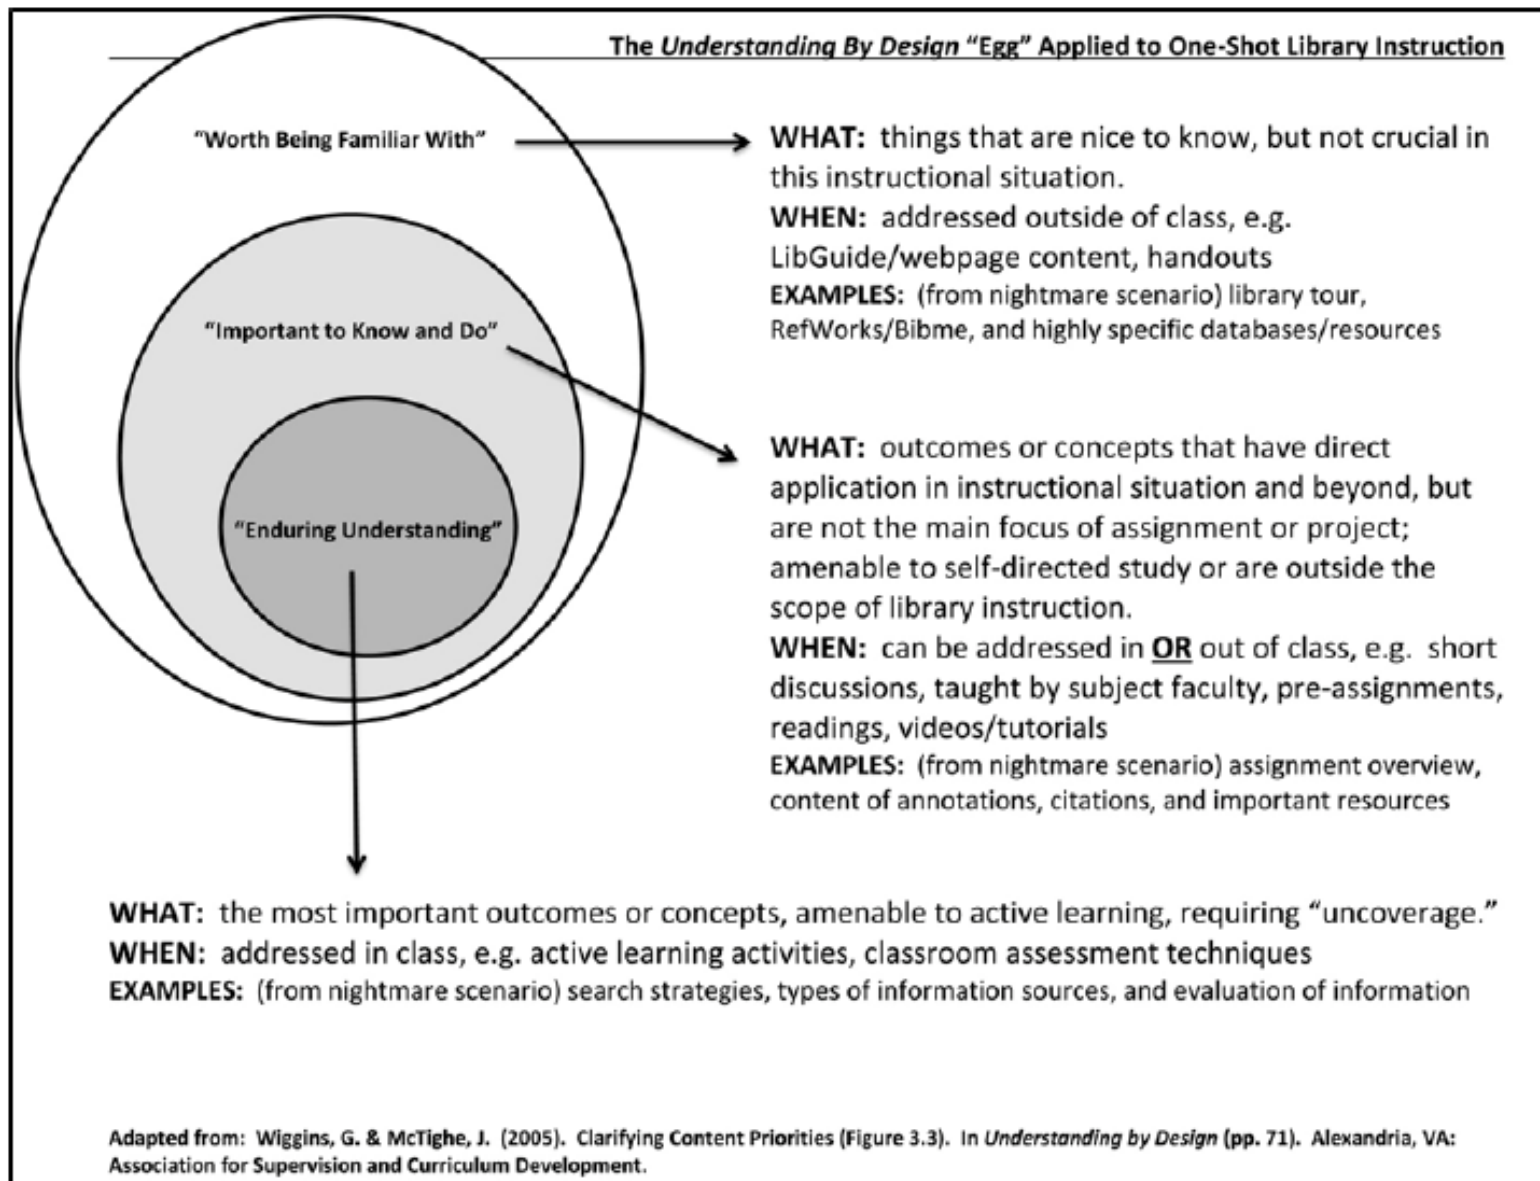

# The “Nightmare Scenario”

Professor: This is the major assignment for the course so there’s quite a lot involved. Let’s see... Well, the students will need to be able to develop search strategies, generate keywords, and use the databases. I really like the MLA International Bibliography, so show them that, and make sure they know how to use all of the features. Actually, they should probably also know how to use Scopus, Academic Search Premier, CQ Researcher, EconLit, EEBO, SciFinder Scholar, Web of Science, Factiva, and Lexis-Nexis. They are writing an annotated bibliography that will be due the following day, so please don’t forget to talk about how to evaluate information. Last semester, they had trouble with that. They will also need to know how to construct an annotation; we don’t go over that in class. And citations! Citing is important. They’ll be using a hybrid of APA and MLA, so be sure to cover both. Ah, I almost forgot the books. I love books, and I know the students do too, so talk about the library catalog! Why don’t you show them around the stacks too? My students say they love books but can’t seem to ever find them. Actually, a tour in general would be great. You do that right? Right. Oh, and the students won’t know their topics when they arrive and likely won’t have any idea why they are there.

Librarian: [Incredulous silence.]

Professor: You still there?

# Principle 1 – Clearly identify goals & expectations

# How to talk to faculty about expectations

- “These are what I’ve identified as the key outcomes that will prepare students for the assignment. Other aspects will have to be done at another time/in other ways (flipped/eClass, pre-made video tutorials, handouts, another session, etc.).”
- “This is what is manageable in the time we have.”
- It’s ok to say no or, at the very least, “I will need more time to do this well.” (Can interpret this two ways: You’ll need more sessions with students or you’ll need more time to prep.)
- Other suggestions?

# Principle 2 – Plan Active Learning Strategies

- Now that you've identified the most essential outcomes/goals for your session, the next step is to think about how you are going to teach these outcomes.
- Are there any that can be done outside of class time? How can you achieve this? (e.g., flipped/eClass, pre-made video tutorials, handouts, another session, etc.)
- Which ones require “uncoverage” – not easily picked up and require hands-on practice, discussion, and interaction for understanding to develop? These are the ones to focus on.

# What is “Active Learning”?

## ■ **Placemat activity:**

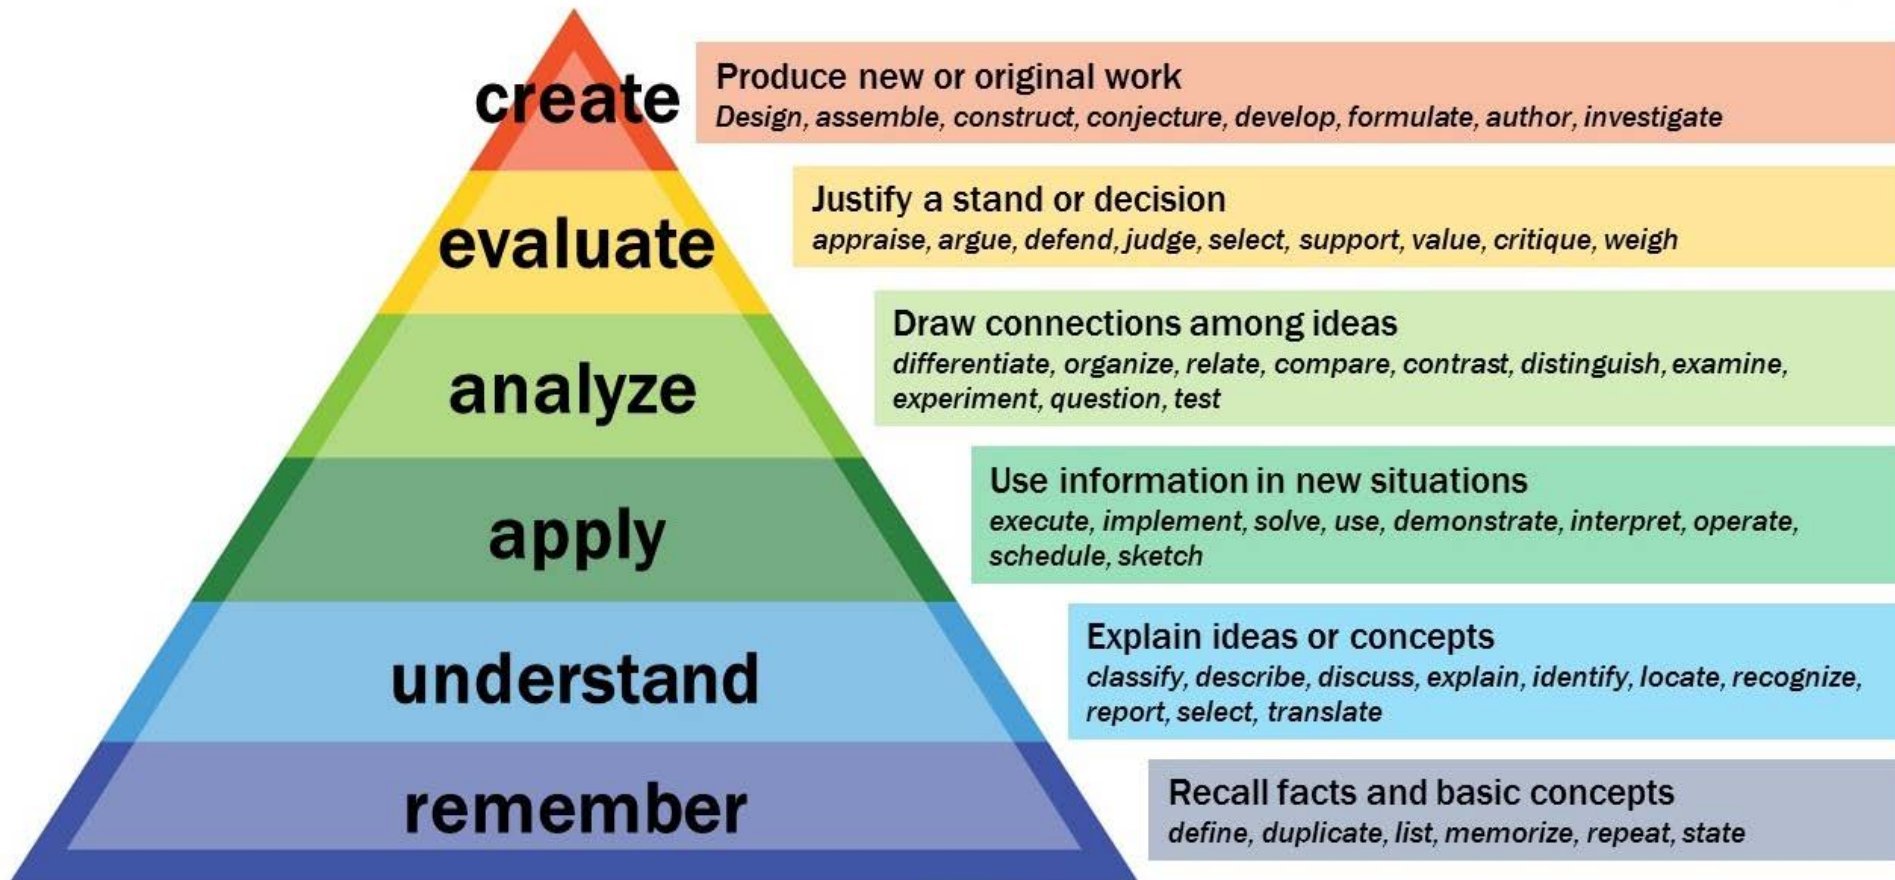

- Each group member writes their own definition of “active learning” in their space on the placemat. **(1-2 minutes)**
- Collaboratively, and through discussion, the group agrees upon a definition of “active learning” and writes this in the middle space. **(3-5 minutes)**

# Active Learning

- “Active learning is a process whereby students engage in activities, such as reading, writing, discussion, or problem solving that promote analysis, synthesis, and evaluation of class content.” – University of Michigan CRTL (<http://www.crlt.umich.edu/tstrategies/tsal>)
- Responsibility for learning is transformed from a one-way responsibility (“the teacher teaches me so I should learn”) to a two-way responsibility (“the teacher teaches me but I also need to actively engage in order to understand and learn.”)
- Promotes higher-order thinking (beyond content memorization)

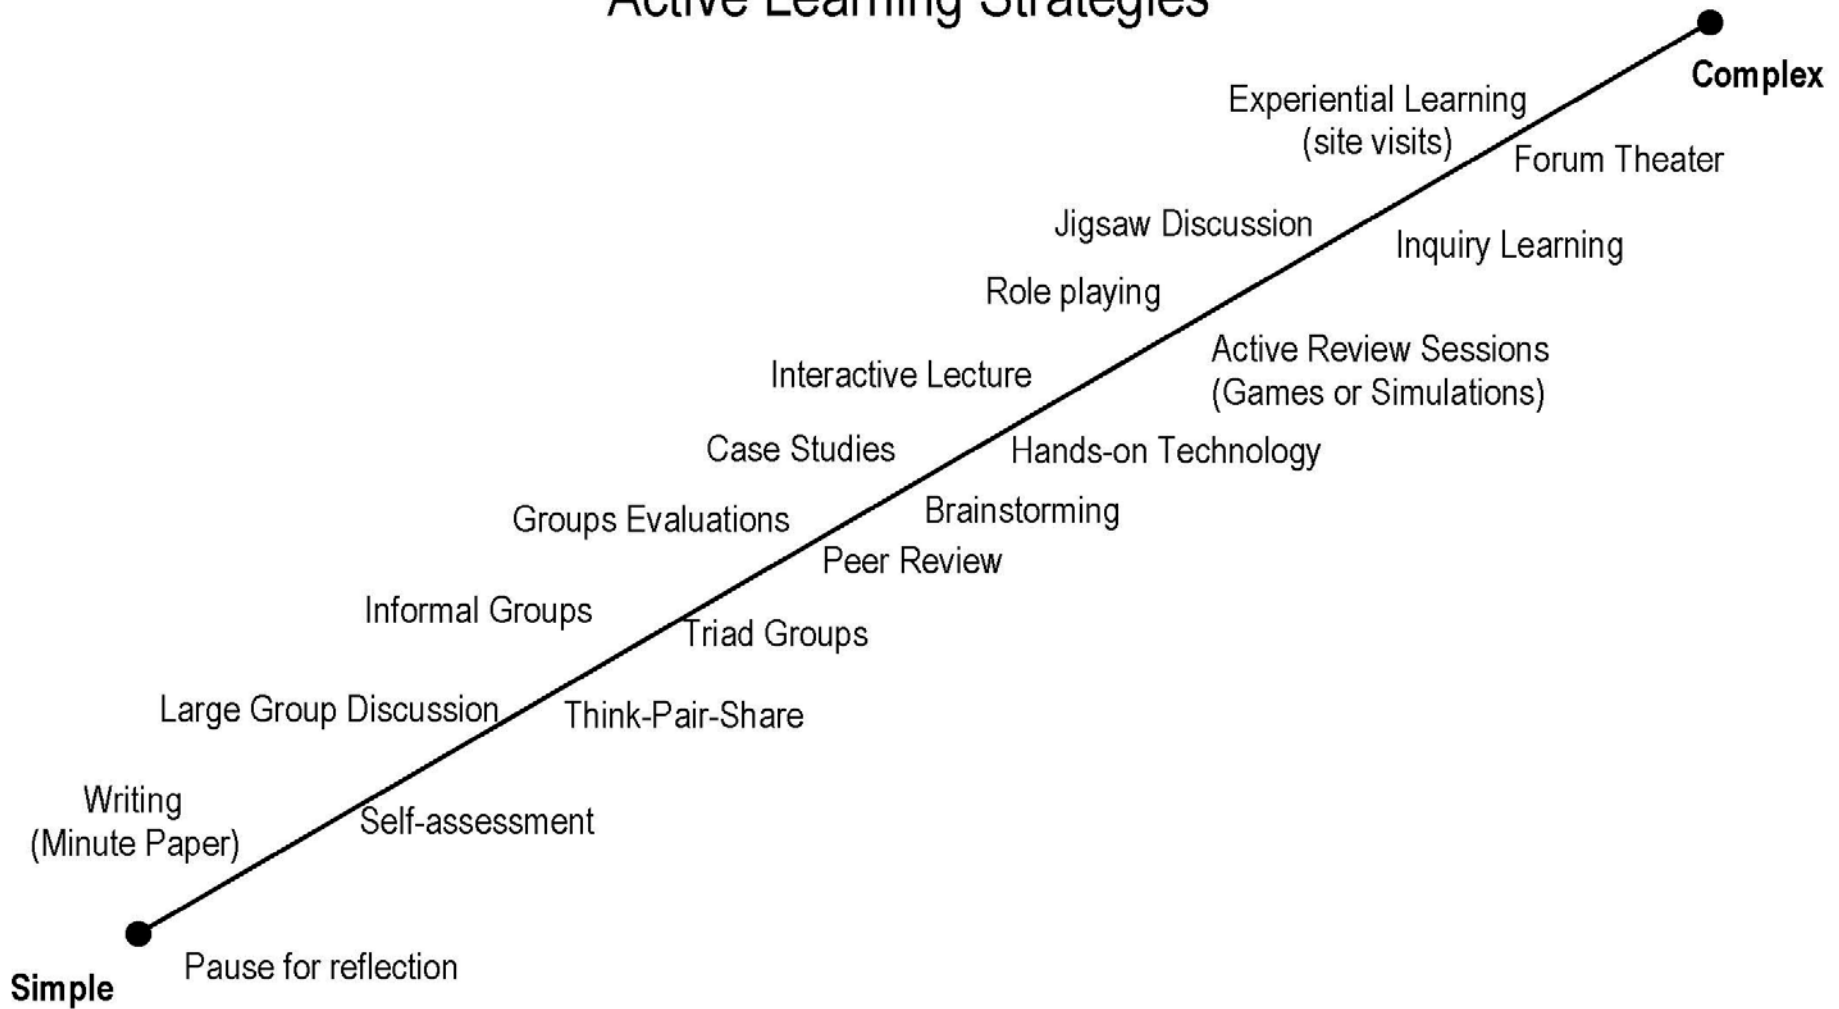

# Bloom's Taxonomy

# Active Learning Strategies

This is a spectrum of some active learning activities arranged by complexity and classroom time commitment.

# Application: Active Learning Strategies

- Identify a typical activity you have students do. How could you make it more “active”?
  - Could they work in pairs?
  - Could they move around to see and discuss what others have done?
  - Could they provide peer feedback?
  - Where are opportunities for small and large group discussions?
  - Other ideas? Think outside the box and your comfort zone.

# Principle 3: Provide time for personalization

- “All students learn better when information is presented in different ways and when they interact with the information and concepts in different modes” (Oakleaf et al, 2012, p. 9).
- Need to provide a wide variety of experiences and opportunities for students to engage with concepts, practice skills, and develop understanding.
- Think about how you can step back and let students take charge of their learning.
- Thinking and doing go hand in hand – don’t fall back on “I need to frontload all this information before students can do anything.”  
**Small doses + time to practice usually works best.**

# How does assessment fit in?

- “You’re not really teaching if you aren’t also assessing.”
- Assessment can happen during active learning time, it can happen at the end of the session, and it can even happen once students have left (instructor does some assessment during next class, etc.)
- Most powerful and obvious opportunities for assessment are during the active learning segments of your session. Walk around- what do you see and hear students doing?
- You need to be clear on what you are assessing – remember the UBD Egg.
- Students need to produce something to assess – could be spoken or written work, or an artifact from the session.

# **Our next session:**

## **Formative assessment strategies**

**April 4<sup>th</sup>, 2016**

**10:00 – 11:30am**

# Maximizing the Effectiveness of the “One Shot” Workshop
